Special to The New York Times.

WASHINGTON, June 22—The Commission on Government Security recommended today a long-range overhauling of all Federal defenses against subversion.

It urged President Eisenhower and Congress to establish a new, independent Central Security Office. This would become a permanent body to study loyalty and security needs in and out of Government and supervise all programs uniformly.

The commission called for more efficient security measures at all sensitive points, from Washington to industrial and atomic energy plants and docks at seaports.

Report Covers 800 Pages

The commission said there should be a law imposing stiff fines and prison sentences on anyone—not only Government employees as at present—who discloses secret papers. It recommended also a law allowing evidence obtained by wiretapping to be used in subversion cases.

An 800-page report, made public today, is the result of a study of a year-and-a-half by a bipartisan group established by Congress in 1955. The twelve members were appointed by the President, Vice President Richard M. Nixon, as President of the Senate, and by Speaker Sam Rayburn of the House of Representatives.

Lloyd Wright of Los Angeles, a former president of the American Bar Association, served the commission as chairman. He delivered the first copy of the voluminous report to President Eisenhower.

James C. Hagerty, the President's press secretary, said General Eisenhower had been informed from time to time on the commission's deliberations and proposals.

"He thinks it's a good report," Mr. Hagerty said. He added that the President would not offer detailed comment until he had studied the recommendations as they became final.

Office 'Core' of Plan

Many who examined the report expected the proposal for a Central Security Office to stand as the "heart" not only of the report, as the commission said, but also of discussion and probable controversy around the recommendations.

The report said that the panel regarded the new agency as the "core of the commission's plan for a uniform, comprehensive and practical mechanism."

The Central Security Office would be designed to "plug loopholes" in present laws and executive orders, while offering "in-
